

The Haven Summer 2024

English

Dolphins

As readers, some of us will be using Project X and PM Benchmark Comprehension to improve our reading skills. Others of us will be using RWI to learn all of our sounds and implement these into reading.

During Summer Term 1 we will be focusing on learning about stories inspired by picture books from the USA. We will primarily use "Where the Wild Things Are" to help us to write our version of the story.

Following this, in Summer Term 2, we will use "Maisie's Dragon" by Phillipa Danvers to help us to write a recount of an imaginary event.

Whales

We will be looking using The World's Laziest Duck and other Amazing Records to help us to write a report about an event as well as using A Child's Garden of Versus to write an opinion.

During the Second half term, we will be working on our narrative writing by writing a Greek Myth from a different person's perspective.

As readers, we will continue to follow Project X to improve our reading skills. Some of us will be using the book The Butterfly Lion whilst others will be using Leonora Bolt Secret Inventor.

Enriching experiences & Character building

Children will have access to Forest School provision at points throughout the year. We will endeavor to give children enriching opportunities via visits, in addition to those that they will attend in their Year group. Please keep an eye on the newsletter for details as well as any emails.

The aim of The Haven provision is not only to support the children's academic progress but also to develop their character, wider developmental skills and learning attitudes.

We focus on this daily through targeted support including fine and gross motor skills, speech and language devel-

Maths

Dolphins

Within our Maths Curriculum, we will be working on different elements depending on the children and their starting point. Within all the areas of the curriculum the children will work on their problem solving skills which will include them being able to explain why an answer is correct.

In the first half term, this will include number facts, halving and quartering, and position and direction for some. For others, we will be learning about fractions, money, and time.

In the second half term, those who haven't already will be doing shape, time and money, and the others will be doing shape, statistics, and multiplication and division.

In all of our Maths lessons, we will be using concrete resources to support the children and their learning will be enhanced by working in small groups supported by an adult. There will be a big focus on the vocabulary of all concepts taught and these are revisited.

Whales

Within our Maths Curriculum we will be working on different elements depending on the children and their starting point. Within all the areas of the curriculum the children will work on their problem solving skills which will include them being able to explain why an answer is correct.

During the Summer Term, we will be extending our knowledge of multiplication and division and decimals. Some of us will be learning about time and shape whilst others of us will be learning about multiplication and division including fractions.

In all of our Maths lessons, we will be using concrete resources to support the children and their learning will be enhanced by working in small groups supported by an adult. There will be a big focus on the vocabulary of all concepts taught and these are revisited regularly.
