Year 3 – Autumn Two 2026

Value of the half term: Truth

Growing together Opportunities for all Learning for life Daring to dream

As **Readers** we will explore the fictional text, The Bookshop Girl, to develop our oracy, comprehension, retrieval and inference skills.

As **Writers** we will be inspired by The Nothing to See Here Hotel by Steven Butler to write recounts about a stay in a hotel. We will also be using the skills we have learnt in Autumn One to write a narrative focusing on different types of sentences and creating cohesion in our work.

As **Mathematicians** we will continue improving speed of recall of our times tables, using arrays, number lines and repeated addition to represent our working.

As **Scientists** we will learn about how shadows are formed, link the position of the sun and Earth to shadows and investigate different materials that light can pass through or is blocked by.

As **Designers** we will get creative with pneumatics! Children will design, make and evaluate their own pneumatic toys, following a specific design brief and criteria. Through experimentation and hands-on construction, they'll learn how air power can bring their designs to life!

As **Historians** we will be learning about the three main periods of the Stone Age, the Bronze Age and the Iron Age, and what life was like in each of them. We will also learn about Skara Brae and Stonehenge and how this is still relevant to our lives now.
